

Healthcare Practice

Force 10 integrates strategy and policy expertise with deep industry partnerships across the healthcare continuum, helping organizations solve their most complex operational and financial issues. Working side by side with our clients, we identify and implement solutions.

Leadership Team

Force 10's healthcare team is led by seasoned experts with operational experience helping distressed healthcare organizations navigate challenging situations.

We assist our healthcare partners by developing and implementing innovative, data-driven solutions that address complex financial and operational issues and overcome unique market challenges. Our team collectively has more than 100 years of healthcare experience and consists of C-Suite professionals including chief executive officers, chief medical officers, chief financial officers, chief nursing officers, and more. We have backgrounds in healthcare economics, management and administration, finance, accounting, and government regulation and enforcement. Our leaders have worked across the industry—from acute hospital care to acute rehabilitation, LTACHs, home health, skilled nursing, MSOs, and behavioral health.

Execution

Identifying, diagnosing, and treating the sources of financial and operational stress, which can destabilize healthcare providers, requires specialized knowledge.

We take an in-person approach to discovering root causes and work with local constituents to find solutions. We successfully navigate the frequently diverging interests of governing boards, administrative teams, medical communities, lenders, unions, and insurance companies.

- Revenue Cycle & cash flow management
- Expense reductions
- Long-term debt structure and capacity
- Resource utilization
- Population Health – full-risk capitation
- Length-of-stay management
- Clinical service lines
- Post-acute product lines
- Primary care networks
- Regulatory compliance
- Medical staff leadership
- Strategic partnerships

Our experts can step in at any point, from course correction at early signs of distress to critical organizational restructuring. We stand ready to implement our recommendations or serve as interim leadership.
